

INFINITY CLOUD SYSTEMS

Inventory Management System Proposal

A centralised stock-control platform for three operational locations

PREPARED FOR

Nardia

PREPARED BY

Infinity Cloud Systems

29 July 2026

COMMERCIAL PROPOSAL • VALID FOR 14 DAYS

One system. Three locations. Clear stock visibility.

1. Executive summary

Infinity Cloud Systems proposes the development of a practical inventory management system that gives management a single, reliable view of stock across HQ Steppes Road, The Hide Safaris and Changa Safari Camp. The solution will replace fragmented manual tracking with consistent stock records, controlled stock movements and management reporting.

DEVELOPMENT	SOFTWARE LICENCE
USD \$1,200	USD \$50
once-off	per month

2. Proposed solution

The proof of concept will demonstrate the complete day-to-day inventory workflow:

- Maintain a central item catalogue with SKUs, categories, units, costs and minimum stock levels.
- View stock balances separately for HQ Steppes Road, The Hide Safaris and Changa Safari Camp.
- Record stock received, stock issued and transfers between locations.
- Prevent issues or transfers that exceed available stock.
- Flag stock lines that fall below the configured minimum level.
- Maintain a dated movement audit trail with references, notes and the person responsible.
- Provide dashboards, management reports and CSV/Excel exports.

3. Expected business value

Visibility	A consistent view of what is available at each location.
Control	Traceable receiving, issuing and transfers with validation.
Planning	Earlier identification of shortages and replenishment needs.
Accountability	A permanent movement history for operational review.

4. Delivery process to proof of concept

1. **Discovery and workflow confirmation** — Confirm users, stock categories, units, source records, approval needs and required reports.
2. **System configuration** — Configure locations, the item catalogue, minimum levels, branding and database rules.
3. **POC development** — Complete the inventory, movement, reporting, export and administration workflows.
4. **Client review** — Demonstrate the solution to Nardia and nominated users using representative operational data.
5. **Pilot and refinement** — Apply one consolidated correction round and prepare the approved POC for handover.

5. Indicative delivery period

The proof of concept is expected to be delivered within 3–4 weeks from written acceptance, receipt of the commencement payment and timely access to the required inventory information. The delivery period may be adjusted where the agreed scope or source-data quality changes.

6. Commercial proposal

Item	Frequency	Fee (USD)
System development and proof of concept	Once-off	\$1,200
Software licence	Monthly	\$50
Total payable in the first month	Initial	\$1,250

7. Payment and licensing terms

- Development fee: 50% (USD \$600) on acceptance and 50% (USD \$600) on POC delivery.
- The USD \$50 monthly software licence begins when the POC is accepted for operational use.
- The monthly licence provides continued authorised use of the system and routine software maintenance.
- Material new modules, third-party integrations, historic data cleaning, devices and specialised infrastructure are outside this proposal and will be quoted separately.
- All fees are stated in United States dollars and exclude any applicable taxes or transaction charges.

8. Client responsibilities

- Provide representative item, location and opening-stock information.
- Nominate users for workflow confirmation and pilot testing.
- Review deliverables and provide consolidated feedback within agreed timelines.
- Confirm the final operating procedures, permissions and report requirements.

9. Acceptance criteria

The proof of concept will be considered delivered when it can demonstrate:

- Stock visibility across all three named locations.
- Receiving, issuing and transfer transactions with correct balance updates.
- Low-stock identification based on configured thresholds.
- Searchable inventory and movement-history views.
- Downloadable inventory and movement reports.
- Successful review with Nardia or a nominated representative.

10. Acceptance

By signing below, the client confirms acceptance of the proposed scope, fees and delivery approach, subject to the terms in this document.
